TAFT CHECKMATES FOES IN THE HOUSE

President Taft has made an important move to checkmate the plan of the Demo-crats to put him in a hole on the open-ing tariff legislation of the scatton. House will be startled to learn that President Tath has already taken ateps to have before him expert data on which he may be able to pass judgment on the Democratic revision of the tron and steel schedule. The President, it was learned last night, has issued rush orders to Herbert Knox Smith, Commissioner of Corporations, to push his investigation of prices in the iron and steel trade to a conclusion and lay the results before the President. Commissioner Smith has dropped practically all other work, and is devoting his ferre to the task of obtaining this data. The importance with which the Democrats regard the first tariff bill of the session is indicated by their selection of the iron and steel schedule. They believe that they have a better chance to get this measure through the Republican Senale and up to President Taft than any other tariff bill.

The Democrats, without the support of the La Polistic-Cumning group in the Senate, will be hables to be served of the staff Senate and in his hables to be served of the staff Senate and the hables to be served or tariff Senate, will be hables to be served or tariff Senate, will be hables to be served or the staff Senate and the served of the staff Senate and the served of the senate of the senat

of the La Policite-Cumning group in the Senate, will be helpless to put any tariff legislation not isseed on the report of the tariff board up to President Taft. Leader Underwood and his associates are rely-ling, however, upon a working under-standing with La Policite and his fol-lowers, similar to the one that they had in the special session of Congress.
